LOCAL ENVIRONMENTAL PROTECTION PROGRAM STATE FISCAL YEAR 2005 ANNUAL REPORT

Overview

The Kansas Department of Health and Environment (KDHE) administers an environmental grant program to local entities for development of a local environmental protection plan to implement the environmental protection strategy of the Kansas Water Plan. An environmental protection plan covers the sanitary code (onsite wastewater code and non-public drinking water well code), subdivision water and wastewater, solid waste management, hazardous waste management, public water supply protection, and nonpoint source pollution control.

Through this grant program, financial and technical assistance is provided to counties to assist in establishing and operating programs for environmental and public health protection. This is accomplished by both the prevention of environmental pollution and the abatement of existing sources of pollution.

KDHE has three Watershed Field Coordinators who have the responsibility to coordinate and administer the Local Environmental Protection Program (LEPP) grants and work with the county LEPP staff. The map on page 10 shows the Watershed Field Coordinators coverage area.

Funding

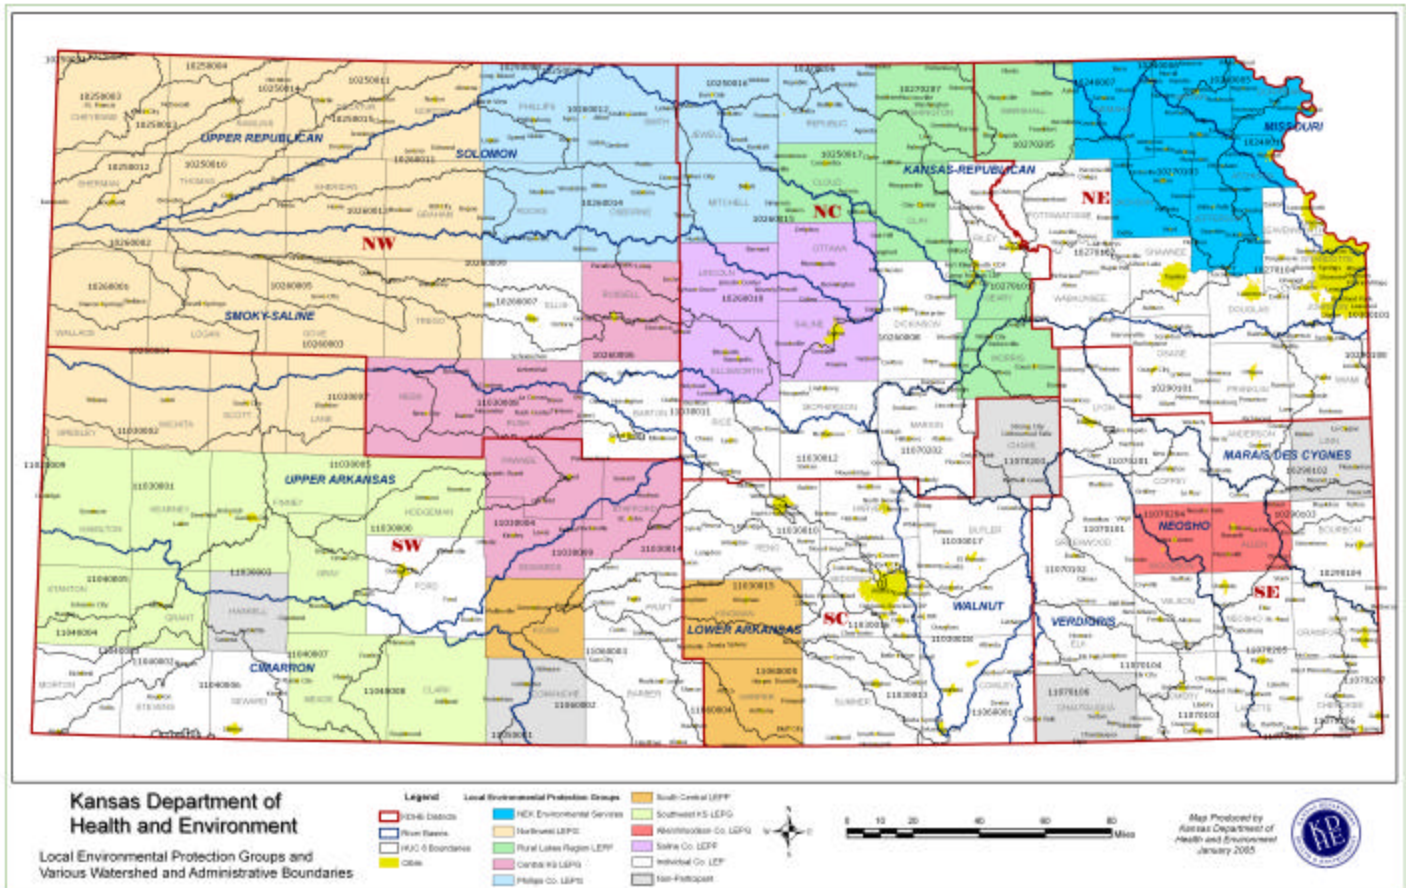

Financial assistance from the Kansas Water Plan fund totaling 1.5 million dollars was allocated to the program during State Fiscal Year 2005 (SFY 2005) for funding of base programs. Figure 1 shows the funding history for the program.

LOCAL ENVIRONMENTAL PROTECTION PROGRAM STATE FISCAL YEAR 2005 ANNUAL REPORT

During SFY 2005, 100 counties received base grants with a minimum of \$7,000 and a maximum of \$125,000. There were 41 single county programs and 9 multi-county programs. There were five counties that didn't participate in the LEPP. They were Chase, Chautauqua, Comanche, Haskell and Linn. Figure 2 shows the program boundaries.

**Figure 2
Program Boundaries**

Funds remaining after base grants are satisfied are available as target grants and can be used to perform specific projects or to supplement base grant funds to purchase equipment and supplies. During SFY 2005, target grants totaling \$22,165.17 were made to 12 LEPPs.

Table 1 on page 11 summarizes the base grants and target grants for each program.

Sanitary/Environmental Codes

LEPP regulations (K.A.R. 28-66-1(b)(2)) state that a core program will include “the development, implementation, and enforcement of a sanitary/environmental code which has

LOCAL ENVIRONMENTAL PROTECTION PROGRAM STATE FISCAL YEAR 2005 ANNUAL REPORT

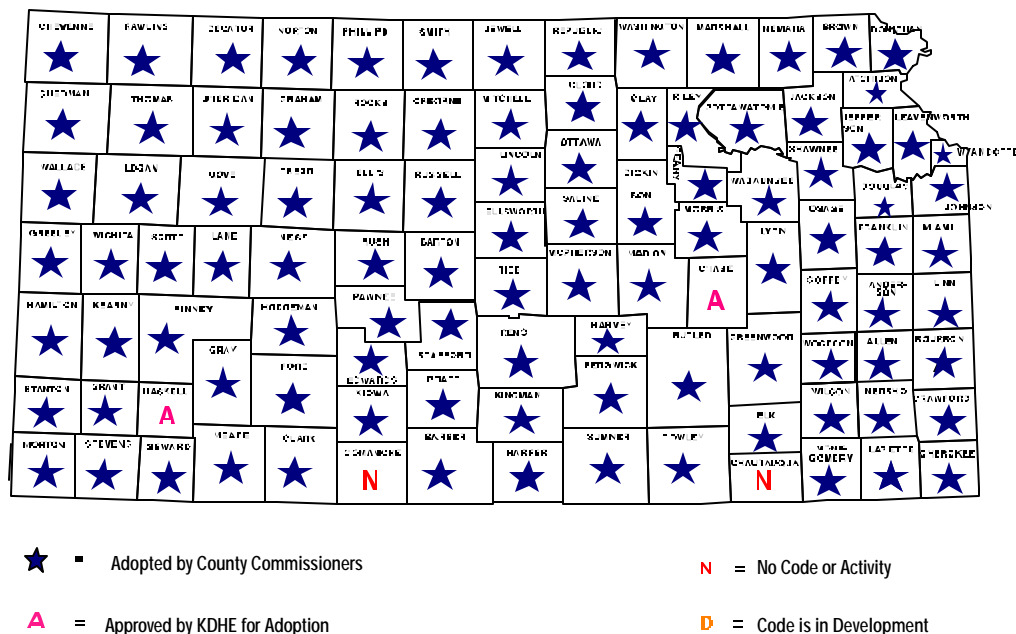

been approved by the secretary of KDHE and which establishes standards for the management of onsite wastewater systems for the treatment and disposal of domestic sewage only.”

During SFY 2005, Lyon County adopted a new sanitary/environmental code.

Figure 3 shows the current status of code activity in the state by county.

Figure 3

ENVIRONMENTAL CODE STATUS

Program Highlights

Kansas Clean Waters

Kansas Clean Waters (KCW) application and reporting system is in the second year of operation. The KCW automates the LEPP application process and quarterly reporting process. All reporting must now be done via the KCW. The KCW can be accessed at <http://kcw.kdhe.state.ks.us/>. When changes in county LEPP staff occur, it is necessary the new LEPP staff member registers their contact information on the KCW system. This is necessary so that they may be able to access their county reporting information.

LOCAL ENVIRONMENTAL PROTECTION PROGRAM STATE FISCAL YEAR 2005 ANNUAL REPORT

Program Reviews

State statute requires that KDHE conduct a periodic review of each Local Environmental Protection Program (LEPP) to determine how locally provided water restoration and protection services address the needs of county citizens, and how LEPP grants from KDHE have enhanced these services. The Bourbon County LEPP was reviewed by Watershed Management Section staff in SFY 2005.

In February, 2005 KDHE staff visited Bourbon County to conduct interviews of County commissioners, local government officials and staff, business members, and other citizens. These questions were asked of all interviewees:

What are the important or valuable water resources in the county?

What are the major threats to these resources?

What tools does the county have or use to address these threats?

What issues have required you to cooperate with other governmental units in the county?

What resources are needed to effectively address water resource problems and concerns in the county?

County commissioners were also asked what water resource protection leadership role they saw for the county commission and how KDHE and other government agencies could assist the county in addressing county water resource concerns?

KDHE staff then prepared findings and recommendations that addressed water resources, LEPP leadership and organization, the sanitary code, Lake Fort Scott, and funding. After the report was presented to the county commission, the commission agreed with the recommendations and agreed to take immediate action on the priority issues of Lake Fort Scott and the sanitarian position. Bourbon County and the City of Fort Scott have since cooperated to hire an environmental specialist to conduct an inventory of onsite wastewater systems at Lake Fort Scott. After the inventory is completed, this individual will continue to work with the LEPP on other environmental health issues.

Events

There were 12 county LEPP staff who attended the 13th Annual National On-site Wastewater Recycling Association (NOWRA) conference held in Albuquerque, New Mexico on November 7-10, 2004. NOWRA provides training and education designed to advance professional development and displays industry equipment and products.

County LEPP staff attended the Kansas Small Flows Association (KSFA) annual conference and trade show in Wichita on February 9-11, 2005. KSFA provides workshops on the latest technologies and methods of on-site system design, installation and maintenance. Industry equipment and products were also on display.

**LOCAL ENVIRONMENTAL PROTECTION PROGRAM
STATE FISCAL YEAR 2005 ANNUAL REPORT**

County LEPP staff attended Soils Workshops across the state hosted by KSFA. The goal of the workshop was to teach fundamentals of a practical method to evaluate soils in the field. LEPP staff utilize this procedure to determine which on - site system is suited for the location.

State Water Plan Priorities

The Water Quality Policy Section of the SFY2006 Kansas Water Plan recognizes the value of the Local Environmental Protection Program as a means of implementing the policies of the Plan. FY 2006 LEP Plans are required to identify activities and tasks the LEP Program will execute to contribute towards attainment of these Kansas Water Plan's 2010 Objectives:

- *By 2010, reduce the average concentration of bacteria, biochemical oxygen demand, dissolved solids, metals, nutrients, pesticides and sediment that adversely affect the water quality of Kansas lakes and streams.*
- *By 2010, reduce the average concentration of dissolved solids, metals, nitrates, pesticides and volatile organic chemicals that adversely affect the water quality of Kansas groundwater.*
- *By 2010, ensure that water quality conditions are maintained at a level equal to or better than year 2000 conditions.*

In the fall of 2003, the Kansas Water Authority made significant changes to how the Kansas Water Plan is developed and written. The major change relevant to LEP Programs is that TMDLs (total maximum daily loads) and public water supply protection are no longer listed as specific priorities, but have been integrated into the "protect and restore watersheds" priority.

The Kansas Water Plan has three top statewide priorities:

- To protect and restore watersheds and water quality.
 - All LEP Programs need to address this priority in their LEP Plan.
- To conserve and extend the life of the Ogallala Aquifer.
 - If the Ogallala Aquifer is an issue for your LEP Program, you need to address this priority in your LEP Plan.
- To develop regional water supply strategies throughout Kansas.
 - You need to be involved in regional water supply issues in your service area.

Some of the Basin Advisory Committees have also determined that other priority issues are important to their basin. All basin priority issues are listed below. LEP Programs must be aware of these and be available to provide assistance.

Program Tracking

Tracking of program progress is essential to ensure implementation of county objectives and provision of local environmental protection services. The Kansas Clean Waters was used to track the county or multi-county activities and accomplishments. See pages 13- 21 for a summary of the County or Multi- County Performance Reports.

Local Environmental Protection Program Goals SFY 2006

- Implement Local Environmental Protection Plans.
- Establish a Local Environmental Protection Committee.
- Develop, implement and enforce an environmental code for onsite wastewater treatment.
- Develop, implement and enforce code for private drinking water wells and supplies.

**LOCAL ENVIRONMENTAL PROTECTION PROGRAM
STATE FISCAL YEAR 2005 ANNUAL REPORT**

- Provide local environmental information, education, and technical assistance.
- Participate in local subdivision water and wastewater programs.
- Promote proper solid and hazardous waste management.
- Participate in local nonpoint source pollution control programs.
- Promote water supply protection.
- Participate in the establishment and implementation of TMDLs.
- Where TMDLs have been established, address the impairments.
